WSP' VISION

WSP accompany the constant changes, and evolution of the market in which it interacts and acts. For WSP it is fundamental to be able to correspond to the necessities of its clients as well as their demands, seeking always to overcome their expectations.

WSP makes a great effort to preserve the safety and health of its cooperators, avoiding pollution, and waste of natural resources, using the most recent technological and technical advances, whenever it is possible.

We vision to competent professionals, with a high capacity, motivated and with a big will to acquire new knowledges.

Each client is unique, and should be treated that way. The clients come always at the first place, and the overcoming of its expectations is our first objective.

WSP'S VALUES

The values are principals, ideas, moral and ethical fundamentals that predominates the organizational culture. Hoping they are adopted by all the members of the organization, defended and practiced by everyone.

We define as Indispensable Values:

- Communication
- Ethical
- Effort
- Responsibility
- Esprit of belonging
- Commitment
- Preservation of health and physical integrity of employees and third parties.
- Environmental protection
- Accuracy
- Respect for regulations

WSP' CULTURE

The culture is bases in the following fundamentals:

- Overcoming the clients expectations;
- Management based on the continuous improvement and achievement of goals;
- Open communication with the clients, cooperators, authorities and all the infested parts;
- Preservation of the workers' health and the Environment;
- Reduction in employees exposure to a level as low as reasonably possible.

The applying of these fundamentals is systematized in the objectives of the integrated management as well as in the indicators of the process which are periodically evaluated.
